During a review of student outcomes in 2000 it was realised that 'if students are not learning the way we are teaching, we must teach the way they learn'. This has led us on a journey that has brought us to our present approach of 'SmART Learning'. 'SmART Learning' provides the school with a means of realising the goals of improving Indigenous Education as set out in 'Bound for Success'. This document provides the backdrop to all of our programs in engaging students, staff and community to improve attendance, retention and transition.
